۱	کلمات در هم ریخته را بازنویسی کنید. 1 . her- cooked- delicious- the- soup- was- by- mother	۱۱
۲	متن زیر را بخوانید و به سوالات پاسخ دهید. A dictionary is a book which explains the meanings of words and expressions. You can find words easily because dictionaries put them in alphabetical order. The word dictionary comes from the Latin “diction” (‘saying’). There are several types of dictionaries. Dictionaries which explain words and how they are used; dictionaries which translate words from one language to another; dictionaries of biography which tell about famous people; and technical dictionaries which explain the meaning of technical words. Dictionaries which explain what words mean give a clear “definition” of them. A good dictionary also gives more information about words. For instance, it explains how they are pronounced. Usually the International Phonetic Alphabet (IPA) is used for this purpose. A good dictionary lists all the meanings of words to help people find the meaning that they look for. A complete dictionary also tells you about the origin of words and the story behind them. For example, the words like “pajamas”, “bazaar”, and “paradise” entered English from Persian. 1. A good dictionary gives only one definition for each word. (True/ False) 2. Some dictionaries do not give users the meaning of words. (True/ False) 3. What is the meaning of “origin”? a. history b. story c. purpose 4. In line 8, “them” refers to a. words b. meanings c. languages 5. What is the difference between technical dictionaries and biographical ones? 6. Why can we find words in a dictionary easily?	۱۲
