The world around us is full of amazing things. Knowing this beautiful world is very interesting for humans. One group of people who study the world are scientists (A³⁷ scientist studies nature, animals, or people)³⁷ Scientists work hard and do research to solve problems, find facts or invent new things. {Scientists learn about the world by observing and experimenting.}³⁶

K

3

36-How do scientists learn about the world?

37-What does a scientist study?

38-Only scientists like to study the world.

True False

39-"solve" means to find an answer to a problem.

True False

The sun, at the center of solar system, and the planets around it are among the wonders of creation. Venus is the second planet from the sun which is sometimes called Earth's twin (دوقلو)⁴⁴ (This is because their sizes and weights (وزن) are similar.)⁴⁴ You can see it without a telescope and it's the second brightest (روشن ترین) object in the night sky after the moon. Thick (ضخیم) yellow clouds are always around Venus. However, Venus and Earth are also different. Venus doesn't have life and it doesn't have water like Earth. It takes two hundred and twenty-four days to orbit the sun, for Earth it is three hundred and sixty-five days. Venus has no moons.⁴⁵ {It is a dry, hot planet.} ⁴⁵ Strong winds blow (وزیدن) all the time. The Romans named it Venus for their goddess of love and beauty.

3

40- It takes two hundred and twenty-four days for Venus to orbit the sun.

True False

41- Venus doesn't have any moons.

True False
